

Art: Popular Visual Culture

A special thanks to University of SC Art Education [Professor Olga Ivashkevich](#) for sharing her student work which comprises this page.

The curricula (links posted below) have been developed by art education graduate students in the Popular Culture class at the University of South Carolina.

Each curriculum includes rationale, unit plan, and one in-depth lesson plan; and is aimed to engage K-12 students in a critical dialogue

about popular images and artifacts followed by art production.
