

# The Post- Production Stills

Compare this first image (what the photographer shot) with the wider shot (below it) showing the production crew outside the frame.

Ask students to make a list of everything they see in the first photo; then the second photo.

Then compare both images to the third image (a different scene) shot with a wide angle.

Do they know/understand who does what on a film set? What are their roles? Why are they important?
